## EXPERIENCE

---

### Vibrent Health

Sr. Software Engineer

2017 - Present

[www.vibrenthealth.com](http://www.vibrenthealth.com)

Sr. Engineer responsible for delivering complex product features. Web App primary contributor, building scalable and modern applications and libraries. Developed and delivered National Institute of Health's research program All Of Us to national launch. It is a platform to support building one of the largest and most diverse datasets for precision medicine health research.

Helped redefine the front end architecture for building a new complex SAAS based research product across all platforms.

**All Of Us** - [Link Android](#) [Link iOS](#) [Link Web](#)

### Stratera Technologies

Software Engineer

2016 - 2017

<http://www.strateratech.com/>

Developed UI features in support of The Patent and Trade Office's Cooperative Patent Classification Database, a new program that used Spring/Restful services displayed with Angular whose purpose was to help employees of the PTO classify patents, search for classifications and maintain their history, where each major release was then used by over 20,000 employees

### Agilex Technologies

UI Developer

2014 - 2015

Front End Web Developer contributing to a suite of apps for the Veterans Administration, in an Agile/Scrum environment with Continuous Integration. Learned about 508 Accessibility Standards.

## EDUCATION

---

### George Mason University

BS in Applied Information Technology

Web Development

2014
